PROJECTS

- Secure2FA

<https://github.com/ig-imanish/Secure2FA>

Secure2FA is a robust two-factor authentication system implementing Time-based One-Time Password (TOTP) for enhanced application security. Built with Spring Boot microservices and Reactjs, it provides a seamless and secure authentication experience.
- Blogging Website x2

<https://github.com/ig-imanish/BlogZone> | <https://github.com/ig-imanish/BlogZone-Clg-project>

BlogZone is a streamlined blog application that allows users to perform CRUD (Create, Read, Update, Delete) operations on blog posts. It includes authentication features to secure user accounts and manage access effectively.

- In **BlogZone**, the backend is built using **Spring Boot**.
 - In **BlogZone-Clg-Project**, the backend is developed using **Express.js**.
